About me

I am a student of HNURE University and Computer Academy ITSTEP. I have been studying there for the last three years and have gained a lot of knowledge and skills in various fields of IT. I have experience in working on team projects and using different tools and technologies. I am proficient in the following programming languages: C++, C# (Win forms, WPF, ADO.net), PHP, Js, Python. I have all the basic knowledge in the listed languages, such as: OOP, working with files and structures, using different libraries and classes. I know how to work with databases such as: Ms SQL Server, My SQL Server. I have experience working on team I have experience in team projects using Git, Trello and with different studios such as: Android SDK, Visual studio, Unreal Engine. I am ready to use all these technologies in my future work.
